By submitting this tender and most importantly by signing the included Declaration on honour – exclusion criteria form, the tenderer certifies that he is not in any of the cases of exclusion listed in the Articles 67 to 70 of the Law of 17 June 2016 and the Articles 61 to 64 of the Royal Decree of 18 April 2017.

The contracting authority will verify the exactitude of this Declaration on honour for the tenderer with the best tender.

For that purpose, the contracting authority will ask the tenderer concerned to provide information or documents allowing the contracting authority to verify the tenderer's personal situation by the fastest means and within the term set by the contracting authority.

The contracting authority will itself ask for information or documents that it can obtain free of charge by digital means from the instances that manage the information or documents.

3.4.7.2. Selection criteria

Moreover, by means of the documents requested in the ‘**Selection file**’, the tenderer must prove that he is sufficiently capable, from an **economic and financial** as well as from a **technical** point of view, to successfully perform this public procurement contract.

In this case the bidder has to clearly indicate the CV (name) of the additional/support staff and to which of the 3 key positions mentioned above, he/she is Supporting (**these additional staff have to be included in the costing of the key staffs**)

3.4.7.3. Overview of the procedure

*Text valid in case **several award criteria** are given in the Tender Specifications.*

In a first phase, the tenders submitted by the selected tenderers will be evaluated as to formal and material regularity. Irregular tenders will be rejected.

The contracting authority reserves the right to have the irregularities in the tenderers’ tender regularised during the negotiations.

In a second phase, the formally and materially regular tenders will be evaluated as to content by an evaluation commission. The contracting authority will restrict the number of tenders to be negotiated by applying the award criteria stated in the procurement documents.

This evaluation will be conducted on the basis of the award criteria given in these Tender Specifications and aims to setting a shortlist of tenderers with whom negotiations will be conducted. **Maximum 3 tenderers** may be included in the shortlist.

Then, the negotiation phase follows. In view of improving the contents of the tenders, the contracting authority may negotiate with tenderers the initial tenders and all subsequent tenders that they have submitted, except final tenders. The minimum requirements and the award criteria are not negotiable. However, the contracting authority may also decide not to negotiate. In this case, the initial tender is the final tender.

When the contracting authority intends to conclude the negotiations, it will so advise the remaining tenderers and will set a common deadline for the submission of any BAFOs. Once negotiations have closed, the BAFO will be compared with the exclusion, selection and award criteria. The tenderer whose BAFO shows the best value for money (obtaining the best score based on the award criteria given below) will be designated the contractor for this procurement contract.

3.4.7.4. Award criteria

The contracting authority will choose the regular BAFO that it finds to be most advantageous, taking account of the following criteria:

a) Technical proposal 60%

The tenderer presents the detailed methodology to perform the requested services showing the suitability with Terms of Reference and comments made on it, activity schedule, staff schedule and work organization between team members based on the instructions given in the Terms of Reference. They are subject to evaluation according to the following sub-criteria:

1.	<ul style="list-style-type: none"> - Detailed methodology including how activities and sub-activities will be performed, (20); - Understanding of (ToRs) & possible comments on the ToRs and overall strategy to be used for the implementation of the assignments (10), - Risk analysis and proposed mitigation measures (5), 	35 points
2.	<ul style="list-style-type: none"> - Relevance of the work distribution among the team members in relation to the person-days allocated to them and timetable of activities. The indicative total number of person-days to be performed by the whole expert team is estimated at 60 person-days. 	25 points

For the technical award criteria, the average score has to be at least 70% (42/60) to qualify for the Negotiation stage.

b) Financial proposal (40%)

With regards to the 'price' criterion, the following formula will be used:

$$\text{Points tender A} = \frac{\text{amount of lowest tender} * 40}{\text{Amount of tender A}}$$

3.4.7.5. Final score

The scores for the award criteria will be added up. The procurement contract will be awarded to the tenderer with the highest final score, after the contracting authority has verified the accuracy of the Declaration on honour of this tenderer and provided the control shows that the Declaration on honour corresponds with reality.

3.4.7.6. Awarding the procurement contract

Articles 41 and 81 of the Law

The procurement contract will be awarded to the tenderer who has submitted the most economically advantageous tender.

Notice though that in accordance with Art. 85 of the Law of 17 June 2016, there is no obligation for the contracting authority to award the procurement contract.

The contracting authority may either decide not to award the procurement contract; either redo the procedure, if necessary, through another award procedure.

The contracting authority maintains the right to award only a certain lot or certain lots.

3.4.7.7. Concluding the procurement contract

Art. 88 of the Royal Decree Award

In accordance with Art. 88 of the Royal Decree of 18 April 2017, the procurement contract occurs through the notification to the selected tenderer of the approval of his tender.

Notification is via digital platforms, e-mail or fax and, on the same day, by registered post.

So, the full contract agreement consists of a procurement contract awarded by Enabel to the chosen tenderer in accordance with:

- These Tender Specifications and its annexes;
- If any, minutes of the information session and/or clarifications and/or the addendum,
- The approved BAFO of the contractor and all of its annexes;
- The registered letter of notification of the award decision;
- Any later documents that are accepted and signed by both parties, as appropriate.

In an objective of transparency, Enabel undertakes to publish each year a list of recipients of its contracts. By introducing his tender, the successful tenderer declares that he agrees with the publication of the title of the contract, the nature and object of the contract, its name and location, and the amount of the contract.

4. Special contractual provisions

This chapter of these Tender Specifications holds the specific provisions that apply to this public procurement contract as a derogation of the 'General Implementing Rules for public procurement contracts and for public works concessions' of the Royal Decree of 14 January 2013, hereinafter referred to as 'GIR', or as a complement or an elaboration thereof. The numbering of the articles below (between brackets) follows the numbering of the GIR articles. Unless indicated, the relevant provisions of the General Implementing Rules (GIR) apply in full.

These Tender documents do not derogate from Art.25-33 of the General Implementing Rules.

4.1 Definitions (Art. 2)

- **Contract manager:** The official or any other person who manages and controls the performance of the contract;
- **Performance bond:** Financial guarantee given by the successful tenderer to cover its obligations until final and good performance of the contract;
- **Acceptance:** Observation by the contracting authority that the performance of all or part of the works, supplies or services is in compliance with good practice and with the terms and conditions of the contract;
- **Progress payment:** Payment of an instalment under the contract after service delivery is accepted;
- **Advance:** Payment of part of the contract before service delivery (if accepted);
- **Amendment:** Agreement established between the contracting parties during contract performance in view of changing documents applicable to the contract.

4.2 Correspondence with the service provider (Art. 10)

Notifications by the contracting authority are addressed to the domicile or to the registered office mentioned in the tender, except if the tender documents require the service provider to elect domicile elsewhere after conclusion of the contract.

4.3 Managing official (Art. 11)

The managing official is **Mrs. Diane UWASE, Private Sector Development Officer,**

Once the procurement contract is concluded, the managing official is the main contact point for the service provider. Any correspondence or any questions with regards to the performance of the procurement contract will be addressed to him/her, unless explicitly mentioned otherwise in these Tender Specifications.

The managing official is responsible for the follow-up of the performance of the contract.

The managing official is fully competent for the follow-up of the satisfactory performance of the procurement contract, including issuing service orders, drawing up reports and states of affairs, approving the services, progress reports and reviews. (S)he may order any modifications to the procurement contract with regards to its subject-matter provided that they remain within its scope.

However, the signing of amendments or any other decision or agreement implying derogation from the essential terms and conditions of the procurement contract are not part of the competence of the managing official. For such decisions the contracting authority is represented as stipulated under the contracting authority.

Under no circumstances is the managing official allowed to modify the terms and conditions (e.g. performance deadline) of the contract, even if the financial impact is nil or negative. Any

commitment, change or agreement that deviates from the conditions in the Tender Specifications and that has not been notified by the contracting authority, will be considered null and void.

4.4 Subcontractors (Art. 12 to 15)

The fact that the contractor entrusts all or part of his commitments to subcontractors does not relieve him of liability to the contracting authority. The latter does not recognise any contractual relation with third parties.

The contractor remains, in any case, solely liable to the contracting authority.

The service provider commits to having the procurement contract performed by the persons indicated in the tender, except for force majeure. The persons mentioned or their replacements are all deemed to effectively be involved in the performance of the procurement contract. Any replacements must be approved by the contracting authority.

Art. 12/3 § 2 of the Royal Decree of 14 January 2013:

3° when this involves a service contract in a sector susceptible to fraud, the subcontracting chain may only have two levels at most, namely the contractor's direct subcontractor and the second level subcontractor.

When the contractor uses a subcontractor to carry out specific processing activities on behalf of the contracting authority, the same data protection obligations as those of the contractor are imposed on that subcontractor by contract or any other legal act.

In the same way, the contractor will respect and enforce to his subcontractors, the provisions of Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (General Data Protection Regulation, GDPR). The contracting authority may conduct an audit of the processing carried out in order to validate compliance with this legislation.

4.5 Confidentiality (art. 18)

The knowledge and information gathered by the tenderer under the framework of this public contract is strictly confidential.

Under no circumstances can the information collected, regardless of its origin and nature, be transferred to third parties in any form.

The tenderer is therefore bound by the duty of discretion.

In accordance with Article 18 of the Royal Decree of 14 January 2013 establishing the general rules for public procurement, the tenderer undertakes to consider and process in a strictly confidential manner any information, all facts, any documents and/or any data, whatever their nature and support, which have been communicated to him, in any form and by any means, or to which he has access, directly or indirectly, in the context or on the occasion of this public contract. Confidential information covers, in particular, the very existence of this public contract, without this list being limited.

Therefore, he undertakes to:

- Respect and enforce the strict confidentiality of these elements and to take all necessary precautions in order to preserve their secrecy (these precautions cannot in any case be inferior to those taken by the tenderer for the protection of his own confidential information);
- Consult, use and/or exploit, directly or indirectly, all of the above elements only to the extent strictly necessary to prepare and, if necessary, to carry out this public contract

(particularly in accordance with the privacy legislation with respect to personal data processing);

- Not reproduce, distribute, disclose, transmit or otherwise make available to third parties the above elements, in whole or in part, and in any form, unless having obtained prior and written consent of the contracting authority;
- Return, at the first request of the contracting authority, the above elements;
- In general, not disclose directly or indirectly to third parties, whether for advertising or any other reason, the content of this public contract.

4.6 Protection of personal data

4.6.1 Processing of personal data by the contracting authority

The contracting authority undertakes to process the personal data that are communicated to it in response to the Call for Tenders with the greatest care, in accordance with legislation on the protection of personal data (General Data Protection Regulation, GDPR). Where the Belgian law of 30 July 2018 on the protection of natural persons with regard to the processing of personal data contains stricter provisions, the contracting authority will act in accordance with said law.

4.6.2 PROCESSING OF PERSONAL DATA BY A SUBCONTRACTOR

During contract performance, the contractor may process personal data of the contracting authority exclusively in the name and on behalf of the contracting authority, for the sole purpose of performing the services in accordance with the provisions of the Tender Specifications or in execution of a legal obligation.

For any processing of personal data carried out in connection with this public contract, the contractor is required to comply with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (GDPR) and the Belgian law of 30 July 2018 on the protection of natural persons with regard to the processing of personal data.

By simply participating in the contracting process, the tenderer certifies that he will strictly comply with the obligations of the GDPR for any processing of personal data conducted in connection with that public contract.

The personal data that will be processed are confidential. The contractor will therefore limit access to data to the strictly necessary personnel for the performance, management and monitoring of the public contract.

For the performance of the public contract, the contracting authority will determine the purposes and means of processing personal data. In this case, the contracting authority will be responsible for the processing and the contractor will be its processor, within the meaning of Article 28 of the GDPR.

Processing carried out on behalf of a controller must be governed by a contract or other legal act that is binding on the processor with regard to the personal data controller and that sets out that the subcontractor acts only on the instruction of the person in charge of the processing and that the confidentiality and security obligations regarding the processing of personal data are also the responsibility of the subcontractor (Article 28 §3 of the GDPR).

To this end, the tenderer must fill out, sign and submit to the contracting authority the subcontracting agreement given in Annex 6.18.

4.7 Intellectual property (Art. 19 to 23)

§1 The contracting authority acquires the intellectual property rights created, developed or used during performance of the contract.

Without prejudice to clause 1 and unless otherwise stipulated in the procurement documents, when the subject-matter of the procurement contract consists of the creation, manufacture or the development of designs or of logos, the contracting authority acquires the intellectual property thereof, as well as the right to trademark them, to have them registered and to have them protected.

For domain names created under the procurement contract, the contracting authority also acquires the right to register and protect them, unless otherwise stipulated in the procurement documents.

When the contracting authority does not acquire the intellectual property rights, it obtains a patent licence of the results protected by intellectual property law for the exploitation modes that are mentioned in the procurement documents.

The contracting authority lists the exploitation modes for which it intends to obtain a licence in the procurement documents.

4.8 Performance bond (Art. 25 to 33)

The performance bond is set at 5% of the total value, excluding VAT, of procurement. The value thus obtained is rounded up to the nearest 10 euros.

In accordance with the legal and regulatory provisions, the performance bond may be constituted either of cash or of public funds or may take the form of a joint performance bond.

The performance bond may also take the form of a surety bond issued by a credit institution meeting the requirements of the law on the statute and control of credit institutions (**BANK GUARANTEE**).

By way of derogation from Article 26, the performance bond may be posted through an establishment that has its registered office in one of the countries of destination of the services. The contracting authority reserves the right to accept or refuse the posting of the bond through that institution. The contractor shall mention the name and address of this institution in the tender.

This derogation is founded on the idea of providing possible local tenderers with an opportunity to submit a tender. This measure is made essential by the specific requirements of the contract.

The contractor must, within 30 calendar days from the day of contract conclusion, furnish proof that he or a third party has posted the bond in one of the ways set out below:

- 1° in the case of cash, by transfer of the amount to the bpost bank account number of the Deposit and Consignment Office. Complete the following form as well as possible https://finances.belgium.be/sites/default/files/01_marche_public.pdf (PDF, 1.34 Mo), and forward it by e-mail to info.cdcck@minfin.fed.be
- 2° in the case of public funds, by depositing such funds, for the account of the Deposit and Consignment Office, with the State Cashier at the head office of the National Bank in Brussels or at one of its provincial agencies or with a public institution with an equivalent function
- 3° in the case of a joint surety, by deposit via an institution that lawfully carries out this activity of a deed of joint surety with the Deposit and Consignment Office or with a public institution with an equivalent function
- 4° in the case of a guaranty, by the deed of undertaking of the credit institution.

This proof must be provided as applicable by submission to the contracting authority of:

- 1° the deposit receipt of the Deposit and Consignment Office or of a public institution with an equivalent function; or

- 2° a debit notice issued by the credit institution; or
- 3° the deposit certificate issued by the State Cashier or public institution with an equivalent function;
or
- 4° the original copy of the deed of joint surety stamped by the Depot and Consignment Office or by a public institution with an equivalent function; or
- 5° the original copy of the deed of undertaking issued by the credit institution.

These documents, signed by the depositor, must state why the performance bond was posted and its precise usage, consisting of a concise indication of the subject-matter of the contract and a reference to the procurement documents, as well as the name, first names and full address of the contractor and, where relevant, that of the third party that made the deposit on the contractor's account, bearing the statement 'lender' or 'mandatary' as appropriate.

The period of 30 calendar days specified above is suspended during the period of closure of the contractor's business for paid annual holidays and the days off in lieu stipulated by regulation or by a collective binding labour agreement.

Proof that the required performance bond has been posted must be sent to the address that will be mentioned in the contract conclusion notification.

Request by the contractor for the acceptance procedure to be carried out:

- 1° For the provisional acceptance: This is equal to a request to release the first half of the performance bond
- 2° For the final acceptance: This is equal to a request to release the second half of the performance bond, or, in case no provisional acceptance applied, to release the whole of the performance bond.

4.9 Conformity of performance (Art. 34)

The works, supplies and services must comply in all respects with the procurement documents. Even in the absence of technical specifications in the procurement documents, the works, supplies and services must comply in all aspects with good practice.

4.10 Changes to the procurement contract (Art. 37 to 38/19)

4.10.1 Replacement of the contractor (Art. 38/3)

Provided that he meets the selection and exclusion criteria set out in this document, a new contractor may replace the contractor with whom the initial procurement contract was agreed in cases other than those provided for in Art. 38/3 of the General Implementing Rules (GIR).

The contractor submits his request as quickly as possible by registered post, stating the reasons for this replacement and providing a detailed inventory of the state of supplies and services already performed, the new contractor's contact details and the documents and certificates which the contracting authority cannot access free of charge.

The replacement will be recorded in an amendment dated and signed by all three parties. The initial contractor remains liable to the contracting authority for the performance of the remainder of the procurement contract.

4.10.2 Adjusting the prices (Art. 38/7)

For this procurement contract, price reviews are not permitted.

4.10.3 Indemnities following the suspensions ordered by the contracting authority during performance (Art. 38/12)

The contracting authority reserves the right to suspend the performance of the procurement contract for a given period, mainly when it considers that the procurement contract cannot be performed without inconvenience at that time.

The performance period is extended by the period of delay caused by this suspension, provided that the contractual performance period has not expired. If it has expired, the return of fines for late performance will be agreed.

When activities are suspended, based on this clause, the contractor is required to take all necessary precautions, at his expense, to protect the services already performed and the materials from potential damage caused by unfavourable weather conditions, theft or other malicious acts.

The contractor has a right to damages for suspensions ordered by the contracting authority when:

- The suspension lasts in total longer than one twentieth of the performance time and at least ten working days or two calendar weeks, depending on whether the performance time is expressed in working days or calendar days;
- The suspension is not due to unfavourable weather conditions;
- The suspension occurred during the contract performance period.

Within thirty days of their occurrence or the date on which the contractor or the contracting authority would normally have become aware of them, the contractor reports the facts or circumstances succinctly to the contracting authority and describes precisely their impact on the progress and cost of the procurement contract.

4.10.4 Unforeseen circumstances

As a rule, the contractor is not entitled to any modification of the contractual terms due to circumstances of which the contracting authority was unaware.

A decision of the Belgian State to suspend cooperation with a partner country is deemed to be unforeseeable circumstances within the meaning of this article. Should the Belgian State break off or cease activities which implies therefore the financing of this procurement contract, Enabel will do everything reasonable to agree a maximum compensation figure.

4.11 Preliminary technical acceptance (Art. 42)

The contracting authority reserves the right to demand an activity report at any time of the assignment to the service provider (meetings held, persons met, institutions visited, summary of results, problems encountered and unresolved issues, deviations from the planning and deviations from the ToR...).

4.12 Performance modalities (Art. 146 et seq.)

4.12.1 Deadlines and terms (Art. 147)

The services must be performed within overall duration of maximum of 4 calendar months as from one day after the date on which the service provider received the contract conclusion notification letter, with a maximum 60-person days.

4.12.2 Place where the services must be performed and formalities (Art. 149)

A comprehensive assessment of the gender gaps/needs within all value chains of the PRISM II project is sought for. These include piggery, poultry, beekeeping, rabbits, aquaculture and horticulture (specific commodities: onions, tomatoes, avocado and passion

fruits). A separate gender assessment will be conducted for each of the above-mentioned value chains.

For the **fish value chain**, the program covers a total of 23 districts; Kigali (Gasabo); East (Bugesera, Rwamagana, Kayonza, Gatsibo, Nyagatare, Ngoma), North (Musanze, Gakenke, Rulindo, Burera), West (Rusizi, Rutsiro, Rubavu, Karongi, Nyamasheke, Ngororero), South (Huye, Gisagara, Nyamagabe, Nyanza, Ruhango and Muhanga).

For the **horticulture value chain**, the program covers a total of 13 districts, Kigali (Gasabo, Nyarugenge), South (Kamonyi, Huye) North (Rubavu, Rusizi, Nyabihu, Musanze), East (Rwamagana, Bugesera, Ngoma, Gatsibo and Nyagatare).

For **pig, poultry, beekeeping and rabbit**, the program covers a total of 15 districts; East (Kirehe, Kayonza, Gatsibo, Bugesera), North (Gicumbi, Burera, Gakenke, Musanze), West (Rutsiro, Nyamasheke, Rusizi,) and for south (Kamonyi, Nyamagabe, Nyaruguru, Huye).

The proposed gender assessment will **cover all steps within the targeted value chains**, including upstream and downstream segments i.e.; input dealership, production, retail–aggregation – processing – distribution/retail, marketing and consumption i.e. a farm to fork assessment.

4.12.3 Evaluation of the services performed.

If during contract performance irregularities are found, the contractor shall be notified about this immediately by fax or e-mail, which shall be confirmed consequently. The contractor is bound to perform the non-complying services again.

When the services have been performed, the quality and conformity of the services shall be evaluated. A report of this evaluation shall be drawn up. The original copy of this report will be sent to the contractor. Any services that have not been performed correctly or in conformity shall be started again.

4.13 Inspection of the services (Art. 150)

If during contract performance irregularities are found, the contractor will be notified about this immediately by fax or e-mail, which will be confirmed consequently by registered letter. The contractor is bound to perform the non-complying services again.

The service provider advises the managing official by registered post or e-mail showing the exact date of dispatch, at which date the services can be controlled.

4.14 Liability of the service provider (Art. 152-153)

The service provider takes the full responsibility for mistakes and deficiencies in the services provided.

Moreover, the service provider indemnifies the contracting authority against damages for which it is liable towards third parties due to late performance of the services or due to failure of the service provider.

4.15 Zero tolerance Sexual exploitation and abuse

In application of Enabel's Policy regarding sexual exploitation and abuse of June 2019 there will be zero tolerance towards any misconduct that could impact the professional credibility of the tenderer.

4.16 Means of action of the contracting authority (Art. 44-51 and 154-155)

The service provider's default is not solely related to services as such but also to the whole of the service provider's obligations.

In order to avoid any impression of risk of partiality or connivance in the follow-up and control of the performance of the procurement contract, it is strictly forbidden to the service provider to offer, directly or indirectly, gifts, meals or any other material or immaterial advantage, of whatever value, to the employees of the contracting authority who are concerned, directly or indirectly, by the follow-up and/or control of the performance of the procurement contract, regardless of their hierarchical rank.

In case of violation, the contracting authority may impose a lump-sum fine to the service provider for each violation, which can be to up to three times the amount obtained by adding up the (estimated) values of the advantage offered to the employee and of the advantage that the contractor hoped to obtain by offering the advantage to the employee. The contracting authority will decide independently about the application and the amount of this fine.

This clause is without prejudice to the possible application of other measures as of right provided in the GIR, namely the unilateral termination of the procurement contract and/or the exclusion of procurement contracts of the contracting authority for a determined duration.

4.16.1 Failure of performance (Art. 44)

§1 The contractor is considered to be in failure of performance under the procurement contract:

1° when the delivery is not carried out in accordance with the conditions specified in the procurement documents;

2° at any time, when the delivery has not progressed in such a way that it can be fully completed on the due dates;

3° when he does not observe written orders, which are given in due form by the contracting authority.

§2 Any failure to comply with the provisions of the procurement contract, including the non-observance of orders of the contracting authority, is recorded in a report ('process verbal'), a copy of which will be sent immediately to the contractor by registered mail.

The contractor must repair the defects without any delay. He may assert his right of defence by registered letter addressed to the contracting authority within fifteen days from the date of dispatch of the report (process verbal). Silence on his part after this period shall be deemed as acknowledgement of the reported facts.

Any defects detected that can be attributed to the contractor render him liable to one or more of the measures provided for in Articles 45 to 49, 154 and 155.

4.16.2 Fines for delay (Art. 46 and 154)

The fines for delay differ from the penalties referred to in Article 45. They are due, without the need for notice, by the mere lapse of the performance term without the issuing of a report and they are automatically applied for the total number of days of delay.

Without prejudice to the application of fines for delay, the contractor continues to guarantee the contracting authority against any damages for which it may be liable to third parties due to late performance of the procurement contract.

4.16.3 Measures as of right (Art. 47 and 155)

§1 When, upon expiry of the term given in Article 44, §2, the contractor has not taken action or has presented means deemed unjustified by the contracting authority, the contracting authority may apply the measures as of right described in paragraph 2.

However, the contracting authority may apply measures as of right without waiting for the expiry of the term given in Article 44, §2, when the contractor has explicitly recognised the defects found.

§2 The measures as of right are:

1° Unilateral termination of the procurement contract. In this case the entire performance bond, or if no bond has been posted an equivalent amount, is acquired as of right by the contracting authority as lump sum damages. This measure excludes the application of any fine for delay in performance in respect of the terminated part;

2° Performance under regie of all or part of the non-performed procurement contract;

3° Conclusion of one or more replacement procurement contracts with one or more third parties for all or part of the procurement contract remaining to be performed.

The measures referred to in 1°, 2° and 3° will be taken at the expense and risk of the defaulting contractor. However, any fines or penalties imposed during the performance of a replacement procurement contract will be borne by the new contractor.

4.17 End of the procurement contract

4.17.1 Acceptance of the services performed (Art. 64-65 and 156)

The managing official will closely follow up the services during performance.

The services will not be accepted until after fulfilling audit verifications, technical acceptance and prescribed tests.

The contracting authority disposes of a verification term of thirty days starting on the final or partial end date of the services, set in conformity with the modalities in the procurement documents, to carry out the acceptance formalities and to notify the result to the service provider. This term commences provided that the contracting authority possesses, at the same time, the list of services delivered or the invoice. Upon expiry of the thirty-day term following the date stipulated for completion of the entirety of the services, depending on the case, an acceptance report or a refusal of acceptance report will be drawn up.

Where the services are completed before or after this date, it is the responsibility of the service provider to notify the managing official by registered letter, and at the same time to ask for the acceptance procedure to be carried out. Within thirty days after the date of receipt of the service provider's request, an acceptance or a refusal of acceptance report will be drawn up, depending on the case.

The acceptance specified above is final.

4.18 Invoicing and payment of services (Art. 66 - 72 and 160)

The contractor/ service provider sends (one copy only of) the invoices and the contract acceptance report (original copy) to the following address:

**To the attention of Gerrit BOSMAN,
Intervention Manager – Enabel
Belgian development agency**

Enabel-PRISM II Project

KIGALI- RWANDA

Only services that have been performed correctly may be invoiced.

The contracting authority disposes of a verification term of thirty days starting on the end date for the services, set in conformity with the modalities in the procurement documents, to carry out the technical acceptance and provisional acceptance formalities and to notify the result to the service provider.

The amount owed to the contractor must be paid within 30 calendar days with effect from the expiry of the verification period, and provided that the contracting authority possesses, at the same time, the duly established invoice.

5.1 Background

The bilateral **agricultural programme** of the Belgian Development Agency (Enabel) aims “to increase access to and the consumption of quality food for the growing population, through developing sustainable, resilient and inclusive agricultural value chains adapted to a context of increasing urbanisation, within an enabling environment for food system transformation”.

The **PRISM II** (Partnership for Resilient and Inclusive Small Livestock Markets) project, which will run from July 2024 until June 2029, prioritises the piggery, poultry, rabbits and beekeeping value chains; and a consolidation of the actions in the Kwihaza intervention that focuses on development of the aquaculture and horticulture sectors.

The expected results of the agriculture intervention are:

- **Result 1:** The capacities of smallholder producers, active in the targeted value chains, are enhanced to improve the quality and quantity of the produce in a sustainable and climate resilient way and to improve their access to local and regional markets;
- **Result 2:** SME’s and young entrepreneurs active at the different levels of the targeted value chains are strengthened to operate in an inclusive and sustainable way and to create decent jobs and incomes;
- **Result 3:** Skills and competences in line with the job opportunities in the targeted value chains and related sectors are enhanced;
- **Result 4:** Access to and consumption of healthy, nutritious and safe food are enhanced;
- **Result 5:** A conducive political and institutional environment for developing sustainable and inclusive value chains within a framework of food system transformation is strengthened.

In all result areas, special attention is drawn to support for youth, women and refugees in the districts of intervention, including districts with refugee camps and host communities. Sex-disaggregated data and specific gender indicators addressing identified gender inequalities will be embedded within the planned interventions and activities.

With funding from the EU and the Government of Luxembourg, Enabel is also implementing the **Kwihaza** project (Transformation towards sustainable food systems) for the period January 2023- December 2026 focusing on the aquaculture and horticulture value chains. Specifically, the Kwihaza intervention is towards *ensuring sustainable production, increased per capita consumption and income generation from the horticulture and aquaculture value chains with a focus on women and youth*. The expected outputs include:

- **Output 1:** that the capacities of smallholder organizations, active in the targeted value chains, are enhanced to efficiently improve quality and quantity of produce, minimize post-harvest losses and improve access to local and regional markets;
- **Output 2:** SMEs and aspiring young entrepreneurs active at the different levels of the targeted value chains are strengthened to operate in an inclusive and sustainable way, create decent jobs and contribute to more sustainable food systems;
- **Output 3:** A conducive environment for inclusive value chains development and sustainable food systems is strengthened.

5.2 Rationale

The agriculture sector remains a priority sector as a backbone of the Rwandan economy, contributing to 31% of Rwanda's GDP and employing 67.6% of population. Almost 80% of the female labour force are working in agriculture, with the majority undertaking subsistence farming. Figures clearly highlight the enormous contribution of women as key producers for both their families, market and the country in general. Yet, women continue to face inequalities due to historical exclusion, the impact of cultural norms/attitudes and marginalization.

Structural and often invisible social barriers in the agriculture sector prevent women from participating and benefiting from the new opportunities within the food system and value chains.¹⁴ For instance, female-managed farms are estimated to be on average 12% less productive than male-managed farms, due to differential access to and returns from productive and financial resources as well as gender-based differences in returns accrued to those productive sources. Key areas of inequality for women (and youth) in agriculture include:

- low levels of financial inclusion;
- low participation in lucrative parts of agri-value chains;
- limited access to extension support, inputs and technologies;
- weak institutional capacity for gender-responsive development of the sector;
- limited control over resources and decision-making.¹⁵

The **Government of Rwanda** has made strong political commitment to accelerating the promotion of gender equality and women empowerment. The elaboration of an agriculture gender and youth mainstreaming strategy and its implementation demonstrates such commitment and the will to mainstream gender in all programs and strategic interventions within the agriculture sector.¹⁶

The **gender transformative approach** is also a general principle within **Enabel's** portfolio (2024-2029) in Rwanda, to be implemented across all different interventions. Women (as well as youth and refugees) constitute a specific target group of Enabel's agriculture interventions and should be given particular attention. Traditional approaches to integrate gender in development programming often fail to address structural and deep-rooted inequalities. Therefore, through the gender transformative approach, the cooperation programme shall attempt to go beyond reaching and benefiting women and girls and move to challenging negative social norms, values and power structures that lie at the heart of gender injustice.

A deepened understanding of the gender context in which women and men work and the social norms in the value chains of Enabel's agriculture program will help to ensure the design of activities that do not inadvertently exclude or disadvantage them in any way. To this regard, a comprehensive **gender needs assessment will determine the key barriers women face and constitute the basis from which specific activities will be derived to tackle these barriers**. With the advancement of gender equality through a specific result area, as well as with sex-disaggregated data and specific gender indicators addressing gender inequalities identified through the gender assessment, the agriculture intervention aspires a substantive impact on advancing gender equality.¹⁷

Tender Specifications RWA23005-10011_Conducting a Gender needs assessment for PRISM II.

5.3 Scope of the assessment

A **comprehensive assessment of the gender gaps/needs within all value chains of the PRISM II project** is sought for. These include piggery, poultry, beekeeping, rabbits, aquaculture and horticulture (specific commodities: onions, tomatoes, avocado and passion fruits). A separate gender assessment will be conducted for each of the above-mentioned value chains.

For the **fish value chain**, the program covers a total of 23 districts; Kigali (Gasabo); East (Bugesera, Rwamagana, Kayonza, Gatsibo, Nyagatare, Ngoma), North (Musanze, Gakenke, Rulindo, Burera), West (Rusizi, Rutsiro, Rubavu, Karongi, Nyamasheke, Ngororero), South (Huye, Gisagara, Nyamagabe, Nyanza, Ruhango and Muhanga).

For the **horticulture value chain**, the program covers a total of 13 districts, Kigali (Gasabo, Nyarugenge), South (Kamonyi, Huye) North (Rubavu, Rusizi, Nyabihu, Musanze), East (Rwamagana, Bugesera, Ngoma, Gatsibo and Nyagatare).

For **pig, poultry, beekeeping and rabbit**, the program covers a total of 15 districts; East (Kirehe, Kayonza, Gatsibo, Bugesera), North (Gicumbi, Burera, Gakenke, Musanze), West (Rutsiro, Nyamasheke, Rusizi,) and for south (Kamonyi, Nyamagabe, Nyaruguru, Huye).

The proposed gender assessment will **cover all steps within the targeted value chains**, including upstream and downstream segments i.e.; input dealership, production, retail–aggregation – processing – distribution/retail, marketing and consumption i.e. a farm to fork assessment.

5.4 Objectives of the gender needs assessment

The gender needs assessment will provide the current context of the gender and agriculture sector, identify existing gender initiatives/programs, identify key issues and capture the views of the community in relation to gender-related issues and needs within the targeted value chains (piggery, poultry, beekeeping, rabbits, aquaculture and horticulture) in all the listed districts of intervention. The assessment will also identify other key actors in gender and agriculture interventions to build synergy in this regard.

The purpose of the proposed gender needs assessment is:

- 1) First, to explicitly **identify the currently existing gender challenges** (gaps/needs) that need to be dealt with within the targeted value chains in the districts of intervention;
- 2) Then, the assessment’s findings will form the basis from which concrete and clear actions can be drawn that will contribute towards achieving gender equality in the targeted value chains in the districts of intervention;
- 3) Lastly, this initial gender needs assessment will form the benchmark for measuring progress of gender indicators of the intervention.
- 4) Map/identify national and international stakeholders in Rwanda delivering on gender and agriculture related intervention within the targeted value-chains.

Specific tasks will address (but not limited to) the following questions:

- In which value chains are women and men most engaged and in which ones not, and what are the underlying reasons?
- What is the proportion of women and men employed at each stage in the chain?
- Roughly what proportion of the businesses involved at each stage are owned by women and men?
- Are women and men paid equally for tasks of equal value?
- Are there gender differences relating to value addition? For instance, are women generally concentrated in lower value-added stages or lower-paying positions?
- Are women more likely to be in informal employment within the value chains and why?
- Which market actors have the greatest market power across sector, such as price setters, and is this to the detriment of women working in the chain?
- Do women and men working in the value chain have different channels to market? If so, what are some of the key differences in their characteristics (e.g., size of market, number of competitors, quality requirements, etc.)?
- To what extent does women's unpaid labor (e.g., as family labourers or contributing to a family business) influence the value chain?
- How do women's businesses fit into the current private sector environment and value chains?
- Which sub-categories of women and men benefit the most in various sectors of the economy?

5.5 Methodology

The comprehensive Gender needs assessment will cover PRISM II previously mentioned Districts using mixed methods (a combination of qualitative and quantitative methods).

A detailed baseline design with data collection instruments is required. Primary and secondary data sources (where available) shall be used. Robust and precise data collection to establish pre-intervention conditions is expected in this task.

A variety of techniques for data collection and analysis for both quantitative and qualitative data should be employed for a comprehensive Gender needs assessment. It is advised that reference is made to the existing contextualized gender assessment frameworks in the agricultural value chains, to further inform the methodology.

To ensure enough data is collected for the groups to be compared based on demographic, gender and intersectionality factors. For instance; age group, sex, location, education/literacy levels, value chain and value chain segment (most importantly to cover the youth and women specifics in the project framework), stratification must be applied in the earlier stages of designing the sampling strategy.

A well-detailed Gender needs assessment work plan shall be provided at the inception phase with details including data collection methods, sampling strategy, fieldwork plan, data processing and analysis and reporting processes.

In this case, he informs the contracting authority in advance and in writing of any change considered with regards to adding or replacing other subcontractors. This information must clearly indicate the processing activities that are subcontracted, the identity and contact details of the subcontractor and the dates of the subcontracting contract. - 8.3. The contractor must, at the request of the contracting authority, provide all necessary assistance and provide all necessary information for the contracting authority to defend its interests in any proceeding - judicial, arbitral or otherwise - brought against the contracting authority or its staff for any violation of the fundamental rights to privacy and the protection of the personal data of the data subjects concerned.

- 9.4. The parties recognise that security requirements are continually evolving and that effective security requires frequent assessment and regular improvement of outdated security measures. The contractor will therefore have to continually assess and strengthen, complete or improve the measures implemented with a view to the continued compliance of his obligations.

- 9.5. The contractor provides the contracting authority with a complete and clear description, in a transparent and understandable manner, of how he handles its personal data (Annex 3).

If there is agreement between the contractor and the contracting authority on a significant breach in compliance with the Regulation and/or the Agreement, as reported in the audit, the contractor will remedy this breach as soon as possible. Parties may agree to put in place a plan, including a timetable for implementing the plan, to address the gaps revealed by the audit.
- 10.6. The contracting authority will cover the costs of any audit carried out within the meaning of this article. Without prejudice to the above, the contractor will bear the costs of his employees. However, where the audit has revealed that the contractor is clearly not in compliance with the Regulation and/or provisions of this Agreement, the contractor bears the costs of said audit. The costs of re-compliance with the Regulation and/or the provisions of this Agreement are borne by the contractor.

Article 13: Behaviour towards national government and judicial authorities

- 13.1. The contractor will immediately notify the contracting authority of any request, injunction, investigation or subpoena of a competent national government or judicial authority addressed to the contractor or its subsequent subcontractor(s) that involves the disclosure of personal data processed by the contractor or a subsequent subcontractor for and on behalf of the contracting authority or any data and/or information relating to that processing.
